SUMMARY

Biologist who moved to London *without speaking English*, back in Spain I worked as a quality advisor, a **challenging and totally new** sector for me. Between obstacles, countries and variety of work environments, my vocation in **web programming was born**.

I am thrilled about this exciting new challenge, **finding my place in the world of** web programming. Web development has become my **newfound passion**, this fusion of **creativity and logic** truly fascinates me.

My history of perseverance guarantees my ability to adapt to work and **evolve to the maximum.** I believe in the **power of constant evolution,** and am committed to enhancing my skills to deliver high-quality results.

EDUCATION

680-hour training in Web Programming

Adalab, 11/2023

- Development of applications, frontend, backend. **React** (SPAs) & **JavaScript**, **Node JS - MySQL - MongoDB** & **mongoose – Render** & **FreeDB, Express JS, Swagger, GitHub, HTML5 - CSS3 – SASS- Responsive / Progressive Design**. **Version control with Git. Agile** & **Scrum, pair programming,** development of **team projects. Unit tests** & **JEST. Postman** & **Rapid Api.**

60-hour Prestashop: virtual store and ecommerce

Vertice elearning innovation, 01/2024

- Management of virtual store, ecommerce and positioning in Google and SEO optimization, Google Adword and social networks.

Biology degree

Salamanca University, 2000 - 2007

TRANSFERABLE EXPERIENCE

Technical advice Quality department

ALS / Aquimisa SL - Consulting and Analysis Quality Control

📅 05/2019 - 06/2022   📍 Salamanca

- Provision of **technical advice** on analysis and regulations applicable to food products, the environment and drinking water.
- Acquisition of technical and interpersonal skills through **customer management and handling complex situations** in the food sector.

Laboratory technician & QA in pharma industry.

Lloyds Pharmacy HomeCare, Bova UK, ITH Pharma

📅 01/2016 - 08/2018   📍 United Kindom

- Development of the ability to **assign priorities** according to the situation or emergency. **Personnel** training.
- **Supervision** of administration, **documentation** and **traceability** work.
- Laboratory **organization**. Microbiologic control. Drug manufacturing.

Laboratory technician

Regional pest diagnosis center, Babilafuente.

📅 2008 - 2010   📍 Salamanca

Detection of Bacteria in potato crops through microbiological tests.

SKILLS

JavaScript | React.js | Node.js | Express.js

GitHub | Agile | Scrum | HTML5 | SASS

MySQL | MongoDB | Prestashop| Swagger

SOFT SKILLS

Teamwork · High understanding · Creativity · Positive attitude

Pair programming · Active learning · Empathy · Adaptability

LANGUAGES

English   Proficient

French   Intermediate

📌 **PORTFOLIO**: https://virchaca.github.io/portfolio/

📌 https://www.linkedin.com/in/virginia-alvarezperez/

Dear Sir/Madame,

My name is Virginia, I have completed 680 hours of training in **web programming**, an additional 60 hours in **PrestaShop** and I am currently studying an **application development course with JAVA** and about to start an **Android application development** course.

I come from the field of **biology** and for a long time I thought about starting **my path** in web development, but It seemed very risky to change job sectors. Finally a year ago I dared to take the step and decided to **reinvent** myself and start researching the world of web programming.

I have gone through many work and personal challenges in my life, going to **London** without knowing English and managing to make my way in the pharmaceutical world, returning to Spain and finding work in the quality control consulting sector, a completely **new field** for me, in which I had to do great efforts to adapt and get hold of it, so I am excited about this new challenge, **find a niche in the world of programming.**

I feel that your **company** would be a **great opportunity for me** to develop myself, to which I can **contribute my desire to learn, my effort and my great motivation**, prosper alongside you and find opportunities to learn and work on impact projects.

I am really loving everything I have learned about programming, web development, understanding and writing code, build and modify applications, create simple databases and work with them. Right now I am very excited to get a place where I can develop and expand my skills.
I am aware that what I have learned is a very small part of the world of web programming, but I can assure you that if you give me the opportunity to join your company, **I will do my best to develop the work and learn as much as possible.**

I am currently documenting and learning with online resources in parallel to my search for employment, to continue training, from what I see in tutorials and courses, once you know how to use some languages and libraries, you have an *open door to learn new ones.*

During the training I have developed a variety of applications, especially the frontend, but also backend and creation of server and simple databases.

I speak **fluent English** and medium level in **French**.

Best regards and thank you for your time.

Virginia
